

Power Budget Example							
Team Number:	302						
Project Name:	Micro Greenhouse						
Team Member Names:	Damien D, Rishik A, Kyle C, Enrique C						
Version:	2						

External Supply Voltage should be determined by the dropout voltage for highest-voltage regulator (e.g., +14V for a +12V regulator).  
If you have multiple units in your design (e.g., a base unit and remote unit) then you need a separate power budget for each unit
